**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 13 January 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 20 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Ahern et al. (6,251,418). Ahern et al. disclose a yieldable distal tip having a frustoconical shape for retain an implant (figs. 3A-B).

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 20-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Palermo (5,312,415). Palermo discloses all the limitation of the claims except fail to disclose the distal tip being formed of a yieldable material. It is well known in the art to have a distal tip of a delivery device being formed of a yieldable material in order to retain and release an implant more accurate at a target site. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the distal tip of Palermo's device from a yieldable material in order to retain and release an implant more accurate at a target site and also reduce friction between the implant and the delivery during releasing the implant at the target site. The materials as claimed, are well known biocompatible materials for making a yieldable distal tip.

Reference supports the well-known statement: Ahern et al. (6,251,418) and Hieshima (6,113,622).

6. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ahern et al. (6,251,418). Ahern et al. disclose all the limitations of the claim except for a presence of the materials for making the yieldable distal tip as claimed. The materials as claimed, are well known biocompatible materials for making a yieldable portion of a delivery device. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to make the distal tip of Ahern et al. device from the known materials as claimed in order to provide the delivery device of Ahern et al. a biocompatible and yieldable distal tip.
